Intro Script

Thanks a lot for participating in the study. We want to collect your genuine feedback on the usability of the system. I am going to record our conversation during the interview. Are you fine with that? (Explain the features in "Three Main Features of the Tool.docx" after the intro)

Questions

1. How do you like minimal specification?

2. What are the difficulties you encounter while you are using minimal specification for analysis?

3. When you hover your mouse cursor over a recommended attribute, a small window with textual description and a bar chart is shown to explain why does the system recommend it to you.

    a. Would you say that the textual description is redundant in the presence of the bar chart?
    b. Would you recommend us to remove the textual description in when a bar chart is present in the small window?
    c. Why?

4. If the bar chart in the small window is removed, how do you think your interpretation of the system's recommendations will be affected?

5. Do you have other feedback for us?
